PROFESSIONAL SUMMARY

Detail-oriented Java Backend Developer with strong command of Spring Boot, SQL, MySQL, and REST APIs. Passionate about OOP design patterns, secure database transactions, microservices, and unit testing.

TECHNICAL SKILLS

Core Languages: Java, SQL, JavaScript, HTML, CSS
Frameworks: Spring Boot, Hibernate, Spring MVC, REST API
Databases: MySQL, PostgreSQL, SQLite, Relational Database Fundamentals
Tools & Methods: Git, GitHub, Postman, Maven, JUnit, Problem Solving, Teamwork

EDUCATION

Bachelor of Science in Computer Science 2021 – 2024
University of Mumbai | GPA: 8.7 / 10.0
Coursework: Object-Oriented Programming, Database Systems, Computer Networks, Operating Systems

PROJECTS & PRACTICAL EXPERIENCE

Hospital Management & Patient Records System Tech: Java, Spring Boot, MySQL

- Developed backend service handling patient registrations, doctor scheduling, and bill calculations.
- Implemented Spring Security role-based access control (Admin, Doctor, Patient) with BCrypt hashing.
- Created 25+ relational MySQL tables with foreign key indexing, handling 1,500+ records safely.

Online Examination & Quiz Evaluation Portal Tech: Java, Spring Boot, REST API

- Built automated quiz evaluation service with real-time scoring and PDF score card generation.
- Wrote comprehensive JUnit test suites achieving 82% unit test code coverage.

CERTIFICATIONS & CREDENTIALS

- Java Programming Masterclass (Udemy)
- Spring Framework 6 & Spring Boot 3 Specialization
- Oracle Certified Associate: Java SE Programmer
